

DRUG FREE SCHOOLS AND COMMUNITIES ACT -The College is required by the Drug Free Schools and Communities Act to adopt and implement a program to prevent the use of illicit drugs and the abuse of alcohol by students and employees. Every student and employee shall have access to the policy annually as printed and it can be located on the BBC website. Additional copies of the policy may be obtained in the Dean of Students Department. Questions concerning the Drug Free Schools and Communities Act may be directed to the Dean of Students, who is designated by the College to coordinate the institution's efforts to comply with the Act. COLLEGE ALCOHOL POLICY: Baptist Bible College takes a position of abstinence, whether on or off campus, regarding the issue of alcohol. The student will be subject to disciplinary action if behavior is found to be inconsistent with the stated position of the College. The College alcohol policy prohibits consumption, possession or distribution of alcoholic beverages on or off campus. It is unacceptable for any person to be under the influence of alcohol while attending BBC. COLLEGE POLICY ON CRIMINAL ISSUES: If any BBC student is arrested by law Enforcement officials for alcohol or drug related actions, immediate suspension from any and all college activities, practices and events will be imposed until the College exonerates the student. As outlined in BBC's Student Handbook, discipline is intended to uphold College standards, promote personal responsibility and be educative in redirecting student behavior. All students who choose not to abide by student conduct policies are subject to disciplinary action. STATE AND FEDERAL LEGAL SANCTIONS FOR ALCOHOL OFFENSES: The standards of conduct are developed through the mission and function of the College and are not limited to standards of criminal action. The College will cooperate with any investigation of suspected illegal action by students. STATE SANCTIONS/Missouri Statutes prohibit the following acts: Purchase or possession by a minor. Any person under 21 years of age, who purchases, attempts to purchase any intoxicating liquor is guilty of a misdemeanor. Section 3 11.325, R.S.Mo. (1986). HEALTH RISKS ALCOHOL: Even low doses significantly impair judgment and coordination. Moderate to high doses cause marked impairments in higher mental functions, severely altering a person's ability to learn and remember information. It results in an inability to deal realistically with problems and increases aggressive behavior. High doses can cause respiratory depression and death. Alcohol can permanently damage the liver, heart, and brain. If used during pregnancy, it can damage the baby. High doses may cause death. TOBACCO: Smoked or smokeless tobacco is a health hazard. Long-term health effects include cancer and heart and lung disease. Smoking is considered to be the leading preventable cause of death in the United States. AMPHETAMINES (SPEED, UPPERS): Can cause a feeling of panic and careless behavior. It can be addictive and can cause brain damage when used in large doses. SEDATIVES: Slows mental processes and reflexes. They are often addictive. Continued use can cause kidney and liver damage or death by overdose, especially if mixed with alcohol. INHALANTS: Inhaling paint, glue, dry cleaning fluids, etc. can cause harm to one's vision, memory, thought processes, memory and coordination. They are usually poisonous and many can kill instantly by interfering with breathing or causing heart failure. ANABOLIC STEROIDS: The use of steroids may result in more than 70 side effects ranging in severity from liver cancer, heart and reproductive system damage to acne. Psychological effects such as aggression or depression

may occur. Even years after discontinuing steroids, they may result in heart attacks and strokes. **DEPRESSANTS:** The effects are similar to the effects of alcohol. Large doses can cause slurred speech, staggering and altered perception. Very large doses can cause respiratory depression, coma and death. **HALLUCINOGENS:** Phencyclidine (PCP) interrupts the function of the section of the brain that controls the intellect and keeps instincts in check. Memory and speech problems may result as well as self-inflicted injuries, mood disorders, depression, anxiety, and violent behavior. Large doses may result in convulsions, coma, heart and lung failure. Severe reactions to LSD often occur. Individuals may have delayed effects or flashbacks after discontinued use. **NARCOTICS:** Initially produce feelings of euphoria followed by drowsiness, nausea, and vomiting. Other symptoms include constricted pupils, watery eyes and itching. An overdose may result in slow, shallow breathing clammy skin, convulsions, coma, and possible death. The use of contaminated syringes may result in diseases such as AIDS, endocarditis, and hepatitis. The use of narcotics while pregnant could result in premature, stillborn, or addicted infants. **DESIGNER DRUGS:** These drugs are produced from chemicals and are often several hundred times stronger than the drugs being imitated. They can produce severe neurochemical damage to the brain. Symptoms similar to Parkinson's disease, anxiety, depression, and paranoia may result. They may also cause illusions, hallucinations, and impaired perception. The descriptions of health risks were obtained through What Works: Schools without Drugs, United States Department of Education 1989.
